PROFESSIONAL SUMMARY

Full-Stack Software Engineer with **3+ years** of experience building and shipping production SaaS applications with **Java, React.js, Next.js, TypeScript, Node.js, PostgreSQL, and AWS**. At Winit, I deliver a multi-tenant **Sales Force Automation** platform for enterprise clients including **PepsiCo, Multiplex, and LBCL**: web applications, an **offline-first React Native app used by 500+ field reps**, and secure **REST APIs**. Strong in **API design, JWT/RBAC security, PostgreSQL performance tuning, CI/CD, and production support**. Also built **AI-powered products** with OpenAI, Gemini, and real-time speech translation.

TECHNICAL SKILLS

Backend & Frontend	Java, REST APIs (RESTful), Node.js (NodeJS), Express.js, WebSockets, React.js (ReactJS), Next.js, TypeScript, JavaScript (ES6+)
Mobile	React Native, Expo, Redux Toolkit, offline-first sync
Databases	PostgreSQL, SQL, MySQL, MongoDB, Redis
Cloud & DevOps	AWS (EC2, S3, CloudFront, API Gateway), Docker, GitHub Actions (CI/CD), Railway, Git
Security & Practices	JWT, OAuth 2.0, RBAC, multi-tenant architecture, Agile/Scrum, code review, production debugging
AI Engineering	OpenAI API, Gemini API, Bhashini API, prompt engineering, Claude Code, OpenAI Codex
Also worked with	Python/FastAPI, Microservices, Firebase Firestore, Elasticsearch, Azure, Tailwind CSS

PROFESSIONAL EXPERIENCE

Win Information Technology (WINIT)	Jul 2025 – Present
<i>Software Engineer</i>	<i>Hyderabad, India</i>

- Develop and maintain features across a **multi-tenant Sales Force Automation platform** (React/Next.js web, React Native mobile, Java/Node.js services) serving **3 enterprise clients and 1,000+ users**, covering retailers, routes, orders, returns, invoicing, and inventory.
- Built **offline-first React Native workflows** with a queued sync engine, so field reps capture orders, returns, and stock with no signal and data **syncs automatically on reconnect**, preventing lost orders in low-connectivity territories.
- Developed secure **backend APIs** with **JWT authentication, RBAC**, and request validation, enforcing tenant-level data isolation for web and mobile clients.
- Tuned **PostgreSQL** queries and reporting flows, **cutting dashboard/report load time from 9s to under 3s** on tables with 5M+ rows; resolved production incidents with root-cause fixes.
- Deliver and maintain releases for **PepsiCo, Multiplex, and LBCL** on **AWS and Railway** via Git-based **CI/CD**, code review, and release validation.
- Use **Claude Code and OpenAI Codex** for refactoring, debugging, and review, with manual validation for correctness and security.

Atomstate Technologies	Jan 2023 – May 2025
<i>Software Engineer</i>	<i>Hyderabad, India</i>

- Built customer-facing apps with **React.js, Next.js, Node.js, FastAPI, TypeScript, and MongoDB**, owning features from UI to API to production release.
- Designed **REST APIs** and integrations for **AI-enabled interview and transcription** platforms, including async workflows and **real-time WebSocket streaming** supporting **50+ concurrent sessions**.
- Containerized services with **Docker** and maintained **GitHub Actions CI/CD**, **reducing deployment time from 30 to 8 minutes**; fixed defects in Agile sprints with product, design, QA, and DevOps.

EDUCATION

Teegala Krishna Reddy Engineering College	2018 – 2022
<i>B.Tech. in Computer Science and Engineering</i>	<i>Hyderabad, India</i>

SELECTED PROJECTS

AI Website Generator with Admin Panel

portal.nextgendigitalcraft.com

Next.js, Node.js, AWS, OpenAI API, Gemini API, Razorpay

- Built a **SaaS platform** that generates complete websites from **natural-language prompts** using the **OpenAI and Gemini APIs**.
- Implemented an **admin panel**, user authentication, and **Razorpay payment integration**; deployed on **AWS**.

Real-Time Call Translation & Transcription

FastAPI, WebSockets, MongoDB, AWS, Bhashini API

- Developed a **multilingual voice service** that streams audio over **WebSockets** for **live transcription and translation** across **10+ Indian languages**.
- Integrated the **Bhashini API**, managed live session state, persisted transcripts in **MongoDB**, and kept end-to-end latency **under 2 seconds**; deployed on **AWS**.

Multi-Tenant Sales Force Automation Platform

React, Next.js, React Native, Java, Node.js, PostgreSQL, AWS

- Implemented **tenant-level data isolation and role-based access** so each client can view only its own data across web and mobile.
- Delivered **order, invoicing, and returns workflows** used daily by **1,000+ users** and processing **5,000+ orders per day**.

Offline-First Field Sales Mobile App

React Native, Expo, Redux Toolkit, REST APIs

- Built **local data capture with a background sync queue and automatic retry**, keeping device and server data consistent after offline use.
- Enabled field reps to complete full routes without connectivity and reduced sync failures by **40%**.

AI Interview & Transcription Platform

React, Next.js, FastAPI, WebSockets, MongoDB, Docker

- Developed a web platform for **AI-assisted interviews** with **live transcription** and real-time updates over **WebSockets**.
- Containerized the application with **Docker** and automated build and deployment using **GitHub Actions**.

Authentication & Role-Based Access Service

Java, Node.js, JWT, OAuth 2.0, PostgreSQL

- Built **JWT-based authentication and role-based authorization** shared by web and mobile clients across multiple tenants.
- Added **request validation and endpoint-level permission checks** to protect enterprise data from unauthorized access.

Sales Reporting & Analytics Dashboards

Next.js, TypeScript, PostgreSQL, REST APIs

- Built **sales, order, returns, and inventory dashboards** backed by **optimized SQL queries**.
- Improved report load speed by **60%** through indexing, query restructuring, and pagination.

CI/CD & Containerized Deployment Pipeline

Docker, GitHub Actions, AWS, Git

- Containerized services with **Docker** and automated build and deployment with **GitHub Actions**.
- Reduced manual release effort and supported **faster cloud releases and defect fixes** with QA and DevOps teams.

ACHIEVEMENTS & ACTIVITIES

- **National-level hackathon finalist**: built a working MVP under tight time limits.
- **Open-source contributor** to React and Node.js projects (github.com/suryakantkumarDev).
- Wrote **modular, reusable code** reused across teams; **mentored junior developers** on Git and clean code.
